#### Compliance Dates

- Existing major sources must be in compliance with this subpart by April 21, 2006.
  - Existing area sources that become major sources after the publication date of this subpart must comply within 3 years of becoming a major source, or by April 21, 2006, whichever is later.
- New major sources must be in compliance by April 21, 2003, or upon startup, whichever is later.
  - New area sources that become major sources after the publication date of this subpart must comply immediately upon becoming a major source.

Check the box that applies:

- Facility is a major source of hazardous air pollutants (HAPs).
- Facility is an area source of HAPs.
- Source classification is unknown.

**NOTE:** A major source is a facility that has a potential to emit greater than 10 tons per year of any one HAP or 25 tons per year of multiple HAPs. All other sources are area sources. The major/area source determination is based on all HAP emission points inside that facility fence line, not just the sweat furnace(s).

**Print or type the name and title of the Responsible Official for the facility:**
