VGBA Suction Outlet Fitting Assembly (SOFA) Installation Information

If the facility has multiple pumps, provide a copy of the log sheet for each pump. Provide information for all SOFAs, including the main drain, skimmer equalizer lines, and suction outlets feeding jets, slides, or play features (if applicable). Components such as manufactured sumps or screws with a different service life or installation date than the cover/grate should be listed on a separate line.

Pool Name: License #		Pump Use: ☐ Circu	Pump Use: □ Circulation □Jet □Feature			Pump Design Flow (gpm)	
Manufacturer	Part Number	Location & Orientation (wall or floor)	Flow Rating (gpm)	Service Life		Date of Installation	

All SOFA components must be installed according to manufacturer's instructions. Maintain this information for review during inspection.
