# Climate Pollution Reduction Grant Timeline

# 404 Permitting Authority Retained by the Army Corps of Engineers

Every four years across Administrations, EPA selects enforcement priorities, called National Enforcement and Compliance Initiatives (NECIs). The Agency appreciates the comments we received from states, in response to the Federal Register notice during the FY 2024-2027 NECI selection comment period, and we look forward to continuing our partnership with states as we begin implementation of the following six FY 2024-2027 NECIs:

1. **Mitigating Climate Change** (new)
2. **Addressing Exposure to PFAS** (new)
3. **Protecting Communities from Coal Ash Contamination** (new)
4. **Reducing Air Toxics in Overburdened Communities** (modified from FY 2020-2024 cycle)
5. **Increasing Compliance with Drinking Water Standards Compliance at Community Water Systems** (continued from FY 2020-2024 cycle)
6. **Chemical Accident Risk Reduction** (continued from FY 2020-2024 cycle)

The selected NECIs will address the most significant public health and environmental challenges, protect vulnerable and overburdened communities, and serve to promote greater compliance with our environmental laws. We will also incorporate environmental justice considerations into all of the NECIs.
